

Saturn

CAT 17/S3

*scales with in-counter
scanner option*

Scales built-in in a counter-top of a cash register stand

A basket to assemble the scales and scanner device

The scales and scanner device mounted in the basket

Functionality and fast servicing

The Saturn scales is dedicated to cooperate with counter-top scanners of bar codes. Thanks to enclosing the scanner in scales housing, you get one compact device, so called scales and scanner device, which provides space saving on a sale stand.

UTILITY FEATURES

Device characteristics

The Saturn scales integrated with the scanner combines functions of a scale and a bar codes reader in one housing. Due to these features, convenient and shop assistant's work is improved because weighing and scanning operation takes place at the same spot. Small dimensions and affordable price are the features of the device that creates perfect equipment for sale stand in a shop of any size. Opportunity to use any reader allows matching the final solution to the potential of units of different investment opportunities. Optional basket placed in a hole cut in the counter-top, facilitates fast mounting of the device and influences aesthetics. Design and mounting manner provides the personnel work according to ergonomics requirements and does not restrict the area for shop assistant's legs.

Scales is equipped with readable display located on a rotary column of adjustable height.

The whole is made of stainless steel.

Appropriation

Scales and scanner device is provided to work on sale stands in trade locations of any size.

One of the most popular usage is opportunity to build it in a cash register box.

Cooperation with peripheral devices

The Saturn scales can cooperate with different type of cash registers (cash register made by ELZAB are recommended), POS terminals and other peripheral devices. Automatic transmission of weighing result eliminates mistakes of manual entering as well as significantly accelerates customer service.

Weighing result can be transferred by pressing the key on scales' display, on cash register, POS terminal or automatically - after platter of the scales has been stabilized or on continuous basis.

Quality and supplies continuity warranty

The Saturn belongs to the family of CAT17 scales, known by especially careful execution. All CAT17 scales meet metrology regulations within the scope of using the scales to direct accounting the business sales, they have approval certificate of EC type and they subject to legalisation according to EU regulations before they are approved for sale.

Production process is accomplished under supervision of ISO 9001 quality system procedures.

Features and benefits

- space saving due to installing two devices in one compact housing mounted in a counter-top of a cash register stand,
- opportunity to check at the sale spot the weight of products weighed on self-service stands,
- measuring system that is stable and resistant to overloads,
- display on a rotary column with adjustable height and readable characters,
- cooperation with cash registers, POS terminals and peripheral devices,
- resistance to burdensome working conditions (stainless steel construction elements),
- tarring within the whole range of weighing,
- opportunity to accommodate the wide range of scanners of different manufacturers.

TECHNICAL DATA

Model:	CAT 17/S3	External dimensions of a platter: (d x w)	292x292mm
Type:	Scales and scanner device, electronic scales, single-range	Keyboard:	3 micro-switches: tare, reset, transmission
Accuracy class:	III	Communication interfaces:	RS232C (with adjustable transmission parameters)
Weighing range/ maximum load:	15 kg	Features:	<ul style="list-style-type: none"> • Products weighing • Weighing and subtracting the tare • Freezing the tare (constant tare) • Cooperation with cash register, POS terminal or peripheral printer
Legalisation graduation:	5 g	The most popular scanner models which the Saturn scales can be integrated with:	<ul style="list-style-type: none"> • Metrologic MS7620 Horizon • Symbol LS5800 • PSC Magellan 2300HS
Upper limit of subtracting tare:	-15 kg	Accessories:	[00590] Assembly basket
Operation temperature range:	-10°C ÷ +40°C	Product code:	[65181] CAT 17/S3/15/292x292
Display:	high-contrast LED on a rotary column of adjustable height 130-380 mm		
Digits height:	14 mm		
Power supply:	External power supply IN: 230V~/50Hz/0,1A/23VA OUT: 12V-1A		
Scales weight:	6,8 kg (platform, column, power supply device)		
External dimensions of a platform: (h x d x w)	121x303x303 mm
